Work Experience

Technical Illustrator
Haworth, Inc 6/26-Present

Began as a summer intern and was invited to continue through the fall while completing my final semester toward a BFA in Industrial Design at Kendall College of Art and Design.

Create technical illustrations and product documentation for commercial furniture, turning design and engineering information into clear visuals for product features, components, assembly, and installation. Work closely with designers, engineers, and other teams to confirm details, update drawings as products evolve, and ensure documentation meets Haworth standards. Build practical knowledge of furniture development, manufacturing, and the process of bringing products from concept to production. Software used: Illustrator, InDesign, Creo, IsoDraw.

- Selected to provide design feedback on a Haworth task chair, contributing user-centered insights on form, function, comfort, and overall product experience.

Stocking Associate
SpartanNash Company 2024-2026

Maintained organized product inventory, stocked shelves efficiently, and assisted customers while supporting a clean and professional store presentation. Worked successfully in a fast-paced retail environment that required strong attention to detail, reliability, and effective time management.

Ground Crew & Counselor
Camp Henry Summer 2023-2024

Assisted with facility maintenance and grounds operations to help ensure a safe, clean, and well-organized camp environment. Supported the supervision of campers, helped coordinate daily activities, and responded to routine needs throughout the day. Worked closely with staff members to complete tasks efficiently, maintain schedules, and provide a positive experience for campers. Through this role, developed stronger teamwork, communication, responsibility, problem-solving, and leadership skills.
